Course Overview

The AI+ Sales Course is tailored for sales professionals and business leaders eager to integrate Artificial Intelligence (AI) into their sales strategies. This course covers the basics of AI, highlighting its significant impact on sales methodologies, including the efficient use of sales data. Participants will discover a range of AI technologies specifically developed for sales purposes, learning about their integration with CRM systems and application in accurately forecasting sales outcomes. The program focuses on how AI can streamline sales operations, enhancing productivity and efficiency across the board. Moreover, the course addresses the ethical considerations and potential biases that may arise with AI usage in sales, ensuring participants are aware of the moral implications. Through engaging practical workshops, the course aims to blend theoretical insights with real-world applications, allowing for a comprehensive hands-on learning experience. Upon completion, participants will possess the necessary skills to implement AI-driven sales strategies, optimize sales performance, and contribute to sustainable business growth, all while navigating the ethical landscape of AI in sales.
