

Customer Experiences with Contact Center AI

Dialogflow ES

Category: AI, Data & Analytics | **Vendor:** Google Cloud

Duration: 4.00 hours (1 days) **3.3 CPD Hours**

Rating: ★ 4.6 (5,878 reviews)

Course Information

Delivery Format: vILT

Course Overview

Improve customer engagement with virtual agents by getting trained in Google's Contact Center Artificial Intelligence (CCAI). Learn how to integrate virtual agents with Firestore for dynamic data retrieval and manage cloud environments with our course on Customer Experiences with Contact Center AI Dialogflow ES. This is a 4-day intermediate-level course catered to Software Developers and Operations Specialists.

About This Course

Improve customer engagement with virtual agents by getting trained in Google's Contact Center Artificial Intelligence (CCAI). Learn how to integrate virtual agents with Firestore for dynamic data retrieval and manage cloud environments with our course on Customer Experiences with Contact Center AI Dialogflow ES. This is a 4-day intermediate-level course catered to Software Developers and Operations Specialists.

Learning Outcomes

Upon successful completion of this course, participants will be able to:

Course Objectives

Define Google CCAI

Explain how Dialogflow can be used in Contact Center applications

Implement a virtual agent using Dialogflow ES

Read and write data from Firestore using Cloud Functions

Use Dialogflow tools and cloud logging for troubleshooting

Describe how to manage virtual agent environments

Identify general best practices for virtual agents

Identify key aspects such as security and compliance in the context of contact centers

Analyze audio recordings using the Speech Analytics Framework (SAF)

Recognize use cases where Agent Assist adds value, Course Objectives

Define Google CCAI

Explain how Dialogflow can be used in Contact Center applications

Implement a virtual agent using Dialogflow ES

Read and write data from Firestore using Cloud Functions

Use Dialogflow tools and cloud logging for troubleshooting

Describe how to manage virtual agent environments

Identify general best practices for virtual agents

Identify key aspects such as security and compliance in the context of contact centers

Analyze audio recordings using the Speech Analytics Framework (SAF)

Recognize use cases where Agent Assist adds value, Course Objectives
