EC-Council Certified Network Defender (CND)

Category: Networking & Security | **Vendor:** EC-Council

Duration: 40.00 hours (5 days) **32.5 CPD Hours** **Rating:** ⭐ 4.6 (5,878 reviews)

Course Information

Delivery Format:	Instructor Led - Online
Certification:	Certified Network Defender (CND)
Related Exam:	CND-v3

Course Overview

Certified Network Defender (CND) is a vendor-neutral, hands-on, instructor-led comprehensive network security certification training program. It is a skills-based, lab intensive program based on a job-task analysis and cybersecurity education framework presented by the National Initiative of Cybersecurity Education (NICE). The course has also been mapped to global job roles and responsibilities and the Department of Defense (DoD) job roles for system/network administrators. The course is designed and developed after extensive market research and surveys.

About This Course

Certified Network Defender (CND) is a vendor-neutral, hands-on, instructor-led comprehensive network security certification training program. It is a skills-based, lab intensive program based on a job-task analysis and cybersecurity education framework presented by the National Initiative of Cybersecurity Education (NICE). The course has also been mapped to global job roles and responsibilities and the Department of Defense (DoD) job roles for system/network administrators. The course is designed and developed after extensive market research and surveys.

Who Should Attend

•Network Administrators •Network security Administrators •Network Security Engineer •Network Defense Technicians •CND Analyst •Security Analyst •Security Operator •Anyone who involves in network operations

Learning Outcomes

Upon successful completion of this course, participants will be able to:

The program prepares network administrators on network security technologies and operations to attain Defense-in-Depth network security preparedness. It covers the protect, detect and respond approach to network security. The course contains hands-on labs, based on major network security tools and techniques which will provide network administrators real world expertise on current network security technologies and operations. The study-kit provides you with over 10 GB of network security best practices, assessments and protection tools. The kit also contains templates for various network policies and a large number of white papers for additional learning.

Detailed Course Outline

1 - Network Attacks and Defense Strategies

- Explain essential terminologies related to network security attacks
- Describe the various examples of network-level attack techniques
- Describe the various examples of application-level attack techniques
- Describe the various examples of social engineering attack technique
- Describe the various examples of email attack techniques
- Describe the various examples of mobile device-specific attack techniques
- Describe the various examples of cloud-specific attack techniques
- Describe the various examples of wireless network-specific attack techniques
- Describe Attacker’s Hacking Methodologies and Frameworks
- Understand fundamental goal, benefits, and challenges in network defense
- Explain Continual/Adaptive security strategy
- Explain defense-in-depth security strategy

2 - Administrative Network Security

- Learn to obtain compliance with regulatory framework and standards
- Discuss various Regulatory Frameworks, Laws, and Acts
- Learn to design and develop security policies
- Learn to conduct different type security and awareness training
- Learn to implement other administrative security measures

3 - Technical Network Security

- Discuss access control principles, terminologies, and models
- Redefine the Access Control in Today’s Distributed and Mobile Computing World
- Discuss Identity and Access Management (IAM)
- Discuss cryptographic security techniques
- Discuss various cryptographic algorithms
- Discuss security benefits of network segmentation techniques
- Discuss various essential network security solutions
- Discuss various essential network security protocols

4 - Network Perimeter Security

- Understand firewall security concerns, capabilities, and limitations
- Understand different types of firewall technologies and their usage
- Understand firewall topologies and their usage
- Distinguish between hardware, software, host, network, internal, and external firewalls
- Select firewalls based on its deep traffic inspection capability
- Discuss firewall implementation and deployment process
- Discuss recommendations and best practices for secure firewall Implementation and deployment
- Discuss firewall administration concepts
- Understand role, capabilities, limitations, and concerns in IDS deployment
- Discuss IDS classification
- Discuss various components of ID
- Discuss effective deployment of network and host-based IDS
- Learn to how to deal with false positive and false negative IDS/IPS alerts
- Discuss the considerations for selection of an appropriate IDS/IPS solutions
- Discuss various NIDS and HIDS Solutions with their intrusion detection capabilities
- Snort
- Discuss router and switch security measures, recommendations, and best practices
- Leverage Zero Trust Model Security using Software-Defined Perimeter (SDP)

5 - Endpoint Security-Windows Systems

- Understand Window OS and Security Concerns
- Discuss Windows Security Components
- Discuss Various Windows Security Features
- Discuss Windows Security Baseline Configurations
- Discuss Windows User Account and Password Management
- Discuss Windows Patch Management
- Discuss User Access Management
- Windows OS Security Hardening Techniques
- Discuss Windows Active Directory Security Best Practices
- Discuss Windows Network Services and Protocol Security

6 - Endpoint Security-Linux Systems

- Understand Linux OS and security concerns
- Discuss Linux Installation and Patching
- Discuss Linux OS Hardening Techniques
- Discuss Linux User Access and Password Management
- Discuss Linux Network Security and Remote Access
- Discuss Various Linux Security Tools and Frameworks

7 - Endpoint Security- Mobile Devices

- Common Mobile Usage Policies in Enterprises
- Discuss Security Risk and Guidelines associated with Enterprises mobile usage policies
- Discuss and implement various enterprise-level mobile security management
- Solutions
- Discuss and implement general security guidelines and best practices on Mobile
- platforms
- Discuss Security guidelines and tools for Android devices
- Discuss Security guidelines and tools for iOS device

8 - Endpoint Security-IoT Devices

- Understanding IoT Devices, their need and Application Areas
- Understanding IoT Ecosystem and Communication models
- Understand Security Challenges and risks associated with IoT-enabled environments
- Discuss the security in IoT-enabled environments
- Discuss Security Measures for IoT enabled IT Environments
- Discuss IoT Security Tools and Best Practices
- Discuss and refer various standards, Initiatives and Efforts for IoT Security

9 - Administrative Application Security

- Discuss and implement Application Whitelisting and Blacklisting
- Discuss and implement application Sandboxing
- Discuss and implement Application Patch Management
- Discuss and implement Web Application Firewall (WAF)

10 - Data Security

- Understand data security and its importance
- Discuss the implementation of data access controls
- Discuss the implementation of Encryption of Data at rest
- Discuss the implementation of Encryption of “Data at transit”
- Discuss Data Masking Concepts
- Discuss data backup and retention
- Discuss Data Destruction Concepts
- Data Loss Prevention Concepts

11 - Enterprise Virtual Network Security

- Discuss the evolution of network and security management concept in modern Virtualized IT Environments
- Understand Virtualization Essential Concepts
- Discus Network Virtualization (NV) Security
- Discuss SDN Security
- Discuss Network Function Virtualization (NFV) Security
- Discus OS Virtualization Security
- Discuss Security Guidelines, Recommendations and Best Practices for Containers
- Discuss Security Guidelines, Recommendations and Best practices for Dockers
- Discuss Security Guidelines, Recommendations and Best Practices for Kubernetes

12 - Enterprise Cloud Security

- Understand Cloud Computing Fundamentals
- Understanding the Insights of Cloud Security
- Evaluate CSP for Security before Consuming Cloud Service
- Discuss security in Amazon Cloud (AWS)
- Discuss security in Microsoft Azure Cloud
- Discuss security in Google Cloud Platform (GCP)
- Discuss general security best practices and tools for cloud security

13 - Wireless Network Security

- Understand wireless network fundamentals
- Understand wireless network encryption mechanisms
- Understand wireless network authentication methods
- Discuss and implement wireless network security measures

14 - Network Traffic Monitoring and Analysis

- Understand the need and advantages of network traffic monitoring
- Setting up the environment for network monitoring
- Determine baseline traffic signatures for normal and suspicious network traffic
- Perform network monitoring and analysis for suspicious traffic using Wireshark
- Discuss network performance and bandwidth monitoring tools and techniques

15 - Network Logs Monitoring and Analysis

- Understand logging concepts
- Discuss log monitoring and analysis on Windows systems
- Discuss log monitoring and analysis on Linux
- Discuss log monitoring and analysis on Mac
- Discuss log monitoring and analysis in Firewall
- Discuss log monitoring and analysis in Routers
- Discuss log monitoring and analysis on Web Servers
- Discuss centralized log monitoring and analysis

16 - Incident Response and Forensic Investigation

- Understand incident response concept
- Understand the role of first responder in incident response
- Discuss Do’s and Don’t in first response
- Describe incident handling and response process
- Describe forensics investigation process

17 - Business Continuity and Disaster Recovery

- Introduction to Business Continuity (BC) and Disaster Recovery (DR) concepts
- Discuss BC/DR Activities
- Explain Business Continuity Plan (BCP) and Disaster Recovery Plan (DRP)
- Discuss BC/DR Standards

18 - Discuss BC/DR Standards

- Understand risk management concepts
- Learn to manage risk though risk management program
- Learn different Risk Management Frameworks (RMF)
- Learn to manage vulnerabilities through vulnerability management program
- Learn vulnerability Assessment and Scanning

19 - Threat Assessment with Attack Surface Analysis

- Understand the attack surface concepts
- Learn to understand and visualize your attack surface
- Learn to identify Indicators of Exposures (IoE)
- Learn to perform attack simulation
- Learn to reduce the attack surface
- Discuss attack surface analysis specific to Cloud and IoT

20 - Threat Prediction with Cyber Threat Intelligence

- Understand role of cyber threat intelligence in network defense
- Understand the types of threat Intelligence
- Understand the Indicators of Threat Intelligence: Indicators of Compromise (IoCs) and Indicators of Attack (IoA)
- Understand the layers of Threat Intelligence
- Learn to leverage/consume threat intelligence for proactive defense

□□ Certification Path

Certified Network Defender (CND)

Exam: CND-v3

Upcoming Schedule

Available training dates for EC-Council Certified Network Defender (CND):

Start Date	End Date	Location	Delivery	Price
28 Sep 2026	02 Oct 2026	Online	Virtual	€3,495.00
25 Jan 2027	29 Jan 2027	Online	Virtual	€3,495.00

Frequently Asked Questions

Q: What delivery options are available for EC-Council Certified Network Defender (CND)?

We offer multiple delivery formats:

- Live Instructor-Led Classroom Online (Virtual/Live Online)
- Traditional Instructor-Led Classroom Training (ILT)
- On-site delivery at your offices anywhere in United Kingdom
- Private dedicated courses customized for your team

Q: What certification does this course prepare me for?

The EC-Council Certified Network Defender (CND) course helps prepare you for the Certified Network Defender (CND) certification path.

Q: Which exam does this course prepare me for?

This course prepares you for the CND-v3 official exam. You can take this exam at any exam center across United Kingdom including London, Manchester, Birmingham, Edinburgh, or live online wherever you are located.

Q: How many CPD hours does this course provide?

The 5-day EC-Council Certified Network Defender (CND) course provides up to 32.5 CPD hours of structured learning. CPD certificates can be provided upon request.

Q: What is the duration of the EC-Council Certified Network Defender (CND) training?

The training takes place over 5 day(s), with each day lasting approximately 40.00 hours including breaks for lunch and refreshments.

Q: Do you provide corporate training for EC-Council Certified Network Defender (CND)?

Yes, we provide corporate training, dedicated training, and closed classes for EC-Council Certified Network Defender (CND). Training can take place anywhere in United Kingdom including London, Manchester, Birmingham, Edinburgh, or live online allowing teams from across United Kingdom or internationally to attend.

Q: Why choose Nexus Human for EC-Council Certified Network Defender (CND)?

Nexus Human is recognized as one of the leading training providers. Our trainers have won multiple awards including:

- Small Firms Best Trainer Award
- National Training Partner of the Year (Ireland) - Multiple Years
- Global Top 30 Instructor Awards (2012, 2019, 2021)
- Tech Excellence Award Nominations
- Learning Performance Institute (LPI) External Training Provider Sponsor 2024

Q: Are there any discount codes available?

Yes! Use discount code **PENPAL5** when booking your EC-Council Certified Network Defender (CND) training. Please note that only one discount code can be used per booking and cannot be combined with other special offers.
