Master Class: Securing Active Directory Deep Dive LEVEL 2

Category: Networking & Security | **Vendor:** Various

Duration: 24.00 hours (3 days) **19.5 CPD Hours** **Rating:** ⭐ 4.6 (5,878 reviews)

Course Information

Delivery Format: Instructor Led - Online

Certification: Certified Security Master Specialization Advanced Windows Security, Certified Microsoft Learning Consultant (MCLC), Certified Learning Consultants

Course Overview

In this follow-up to the Master Class Active Directory Security, you will learn everything that could not be discussed in the first course due to time and know-how constraints.

We have added another "spurt" of security topics.

Look forward to a worthy successor to our Master Class Active Directory Security.

Please note:

You can only participate in this follow-up course if you have previously attended the Master Class Active Directory Security with Andy Wendel as trainer.

In the first MasterClass Active Directory Security course, we already covered the most important topics for securing your Active Directory.

Over the last few years, the questions for even deeper topics and approaches have become louder and louder in our courses.

Here comes our answer.

Three days of intensive Active Directory security topics.

Look forward to the successor.

We promise: Our best know-how for you and your day-to-day work from our most experienced trainers and consultants.

About This Course

- Review of best practices from the MasterClass Securing Active Directory FastPass.

- LAPS for domain controllers - does NOT work - but it does!

We show you how to secure the DSRM password rolling and encrypted incl. password history!

- DSRM-User: From emergency administrator to domain admin:

What a simple registry hack can do and what you should do about it...

- Unified Write Filter - a completely unknown solution for Windows 10/11 clients: Kiosk mode for professionals and for Privileged Admin Workstation - PAWs with "sheriff cards")

- Multi-tenant Active Directory - how to hide organizational units (Ous) for administrators who should not see them: Object List

No one dares to do it - how to show you how to do it and how the pros do it!

- MBAM & Bitlocker: Bitlocker on Steroids

Microsoft BitLocker Administration and Monitoring 2.5 - even if the extended support ends in 2026 - MBAM is absolutely worth a look!

- Hiding TIER-0 admins via Powershell

What I can't see, I can't attack....

How to hide your crown jewels...

- Bloodhound: Hunting for Privileges

Install and use Bloodhound - let's hunt for privileges!

- PAM feature with Server 2016: JEA & JIT

Just enough Administration with JustInTime Administration

With Server 2016 came - for most undiscovered - the PAM feature:

Privileged Access Management for Users: Time-to-Live for Administrators who manage the Tickets

- When it should be less:

Authentication Silos & Authentication Policies

Who, How, Where, and When...

- Build, maintain and administer tier models en detail

Tier and ESAE model in practice.

- Windows Defender for Identity

- Lithnet Active Directory Password Protection

- DNS-SEC - Run DNS in a highly secure way

Trust-Anchors

DNS over https (DoH)

- SMB encryption AES 256

Operate SMB highly secure

- UNC Hardening

- From DNS-Admin to DomainAdmin

How to go from small to big...

- LocalAccountTokenFilterPolicy

- LDAP-S, signing and channel binding

What exactly is it about and why LDAP-S is not LDAP-signing...

- LDAP-S and SSL V2, V3 and TLS V1 - what then now

LDAP-S en detail

- "Notes from the field - our experience from 10 years of hardening Active Directory

- LAPS

- Protected Users

- KRBTGT Reset

- PingCastle

- Questions from the participants

Your Trainer

The Advanced Master Class was developed by Andy Wendel and is delivered by himself and his experienced team.

Andy Wendel is a Senior Data Center and Cloud Architect and Certified Security Master Specialization Advanced Windows Security. He was and is trained by the internationally renowned security experts Paula Januszkiewicz (http://cqure.pl/paula-januszkiewicz/) and Sami Laiho (https://www.samilaiho.com/?/). This certification is renewed every year. Andy Wendel has been working as an IT trainer and consultant since the late 1990s and is also a Certified Microsoft Learning Consultant (MCLC). Worldwide, Microsoft has only awarded 56 Certified Learning Consultants.

Who Should Attend

This course is designed for experienced system administrators, consultants and Active Directory designers. After this seminar, you will be able to design, implement and consult on Active Directory in a highly secure manner.
